plt.scatter(x = " " y = " ")

plt.plot(x = " " y = " ")

plt.boxplot(x = " " y = " ")

Bar | column charts:

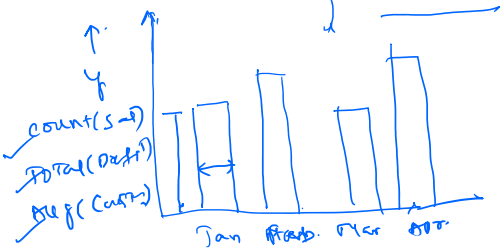
- axis 0 ⇒ categorical.
- axis 1 ⇒ any aggregation (max, min, mean, sum, median, count).

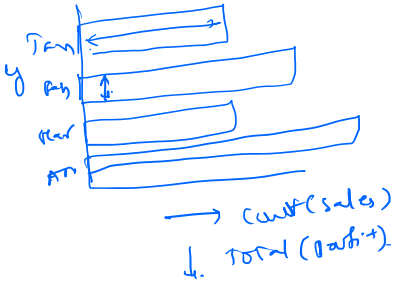
Box plot:

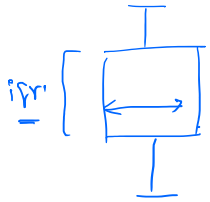
↓ continuous →

↓ quartiles

Column charts.







plt.bar(x = "categorical column",
height = "aggregated column",
data =
width =
).

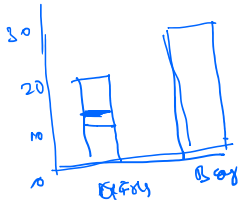
plt.barh(y = 'categorical column'
width = 'aggregation column'
height =
data =
).

Simple Bar | column chart:

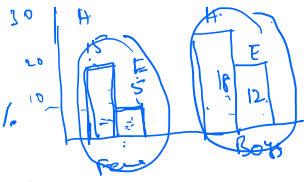
Students ⇒ 50 → 20 (Girls) + PL ⇒ Hindi (15), PL ⇒ English (5)
→ 30 (Boys) + PL = Hindi (18), PL = English (12)

Clustered Bar | column chart:

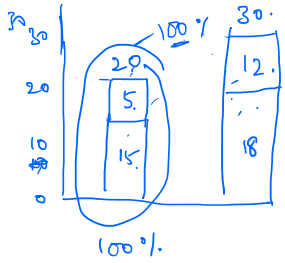
↓ Group.



Clustered



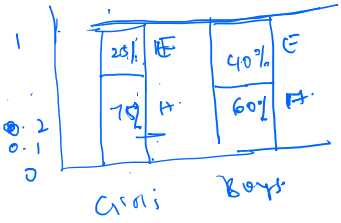
Stacked Bar | column chart.



5 of 20 → $\frac{1}{4}$ = 25%

15 of 20 → $\frac{3}{4}$ = 75%

12 of 30 → 2/5 = 40% (E).

18 of 30 → 3/5 = 60% (H)


100% Stacked column | Bar chart.
